

World Vision Zambia(WVZ) is actively working to support the fight against COVID-19 – everywhere we work – in nearly 55 districts across the country. Our ongoing large-scale programs enable us to respond rapidly, effectively, and efficiently. Our focus is on helping the most vulnerable children overcome poverty and experience fullness of life. When disaster strikes, we are on the ground, quickly providing immediate support and we stay helping to rebuild lives for children, families, and communities.

WVZ has been complementing Governments efforts in preventing the spread of the corona virus by mobilising resources from its partners to support the multi-sectoral approach aimed at strengthening infections, prevention and control measures in all the isolation centers and health facilities across the country.

With **ZMK17,400** one health care facility can be installed with hand-washing facilities at critical points of care, which include toilets, out patient departments, delivery rooms and food preparation areas.

*Before the pandemic, Josephine waiting with other mothers for postnatal exam a Health Centre*

With **ZMK13,820** cleaning materials, detergents and soap/sanitizers can be purchased and distributed to one health care facility.
